32/14/24, 6th Lane, Henewatte, Meegoda, Sri Lanka

## OBJECTIVE

Seeking a challenging position in Artificial Intelligence to leverage my expertise in computer vision, deep learning architectures, and machine learning algorithms. Aiming to contribute to innovative projects at the intersection of AI research and practical problem-solving in fields such as object detection, natural language processing, and intelligent systems development.

## EXPERIENCE

- Sampath IT Solutions**  *Nov 2024 - May 2025*  
*Internship Trainee* *Colombo, Sri Lanka*
  - Developed YOLOv5-based exam proctoring model detecting prohibited devices with 84.2% precision and 86.2% mAP50, trained on 817 images across 5 classes
  - Implemented face detection and recognition system for secure LMS authentication and identity verification
  - Integrated AI models into production LMS platform with reliable real-time processing capabilities

## EDUCATION

- General Sir John Kotelawala Defence University** *Jan 2022 - Dec 2025 (Expected)*  
*B.Sc. (Hons) in Electronics and Telecommunications Engineering* *Rathmalana, Sri Lanka*  
*GPA: 3.6/4.0*
- Thurstan College** *2016 - 2018*  
*GCE Advanced Level - Physical Science Stream* *Colombo 03, Sri Lanka*

## PROJECTS

- Multi-Person Textured 3D Mesh Reconstruction: Ongoing Research** *Present*  
*Tools: PyTorch, OpenCV, Deep Learning Frameworks*
  - Developing deep learning pipeline to reconstruct textured 3D human meshes from single RGB images
  - Implementing multi-person pose estimation and texture mapping using state-of-the-art computer vision techniques
- Phishing URL Detection System: Web Security Application** *Mar - Jul 2025*  
*Tools: Python, XGBoost, Random Forest, Flask*
  - Built and deployed ML-based phishing detection system achieving 93.57% accuracy and 97.67% AUC
  - Developed full-stack web application for real-time URL threat analysis and cybersecurity awareness
- Customer Churn Prediction Model: Predictive Analytics** *Oct - Dec 2024*  
*Tools: Python, Scikit-learn, Pandas, Supervised Learning*
  - Built classification model to predict customer churn achieving 93% accuracy and 94.9% ROC-AUC score on 143K samples
  - Addressed class imbalance challenges, achieving 65% recall for minority class with 54% precision

- **Voice-Assisted AI Chatbot on Raspberry Pi: Embedded AI System**
- Dec 2023 - Feb 2024

Tools: Python, Whisper, Google Gemini API, pyttsx3, Raspberry Pi

- Developed voice-controlled chatbot integrating speech recognition (Whisper) and Gemini LLM on Raspberry Pi
- Implemented real-time speech-to-text processing and text-to-speech response system with natural conversation flow

SKILLS

- **Programming Languages:** Python, C/C++, Bash
- **Machine Learning & Deep Learning:** PyTorch, TensorFlow, Scikit-learn, OpenCV
- **Data Science:** NumPy, Pandas, Matplotlib
- **Tools & Platforms:** Git, Linux, Raspberry Pi
- **Core Competencies:** Computer Vision, Object Detection, Supervised Learning, Model Optimization

AWARDS AND ACHIEVEMENTS

- **Binary Prediction with Rainfall Dataset - Top 5%**
- Mar 2025
- Kaggle Playground Series
- Ranked 204th out of 4,381 teams, demonstrating strong feature engineering and ensemble modeling skills
- **Synthetic to Real Object Detection Challenge - Top 5%**
- Mar - Apr 2025
- Kaggle Competition
- Ranked 6th out of 115 teams in domain adaptation challenge bridging synthetic and real-world object detection
- **Synthetic 2 Real Object Detection Challenge 2 - Top 30%**
- Apr - May 2025
- Kaggle Competition
- Ranked 30th out of 102 teams in computer vision competition focused on sim-to-real transfer learning

LEADERSHIP AND VOLUNTEER EXPERIENCE

- **Director of Membership Promotions**
- 2024 - 2025
- Institution of Engineering and Technology (IET) - KDU Chapter
- **Education Team Member**
- 2023 - 2024
- Electronic, Robotics & Innovation Club - KDU
- **Program Team Member**
- 2023 - 2024
- IEEE Communications Society - KDU

ADDITIONAL INFORMATION

**Languages:** English (Fluent), Sinhala (Native)  
**Interests:** Computer Vision Research, Open Source Contribution
